

Apprentice Training Program

At Guardian Fire Protection, the success of our business lies in the talented employees we hire. We pride ourselves in recruiting passionate industry leaders and experts. Our company continues to expand, and we're excited to grow!

We offer robust training for Apprentices to become Lead Technicians and want our Apprentices to make a lifelong career out of the fire safety industry.

We offer paid hands-on development training for all our Apprentices. Apprentices work directly with licensed Guardian technicians onsite observing customer inspections, repairs, or installations for various fire protection equipment.

We believe the best way to learn is through experiences and provide support every step of the way.
