

HVAC, Co. in City, State is continuously recruiting a full-time HVAC Service Technician to repair commercial heating and air conditioning systems while providing exceptional customer service. Do you feel fulfilled by working with your hands? Are you looking for an opportunity to grow your experience in an essential industry? Would you like to join a company that wants its employees to thrive? If so, please read on!

Our HVAC Service Technicians typically work Monday - Friday, 8:00 AM - 4:00 PM with possible overtime hours. This air conditioning service position comes with a competitive wage of \$\$-\$\$/hour, depending on experience. We provide solid benefits and perks, including medical, dental, vision, and a retirement matching program. Additionally, we offer our HVAC Technicians a company service vehicle. If this sounds like the right air conditioning service opportunity for you, apply today!

ABOUT HVAC, CO.

Since we first opened our doors in 1977, we here at HVAC have been prioritizing customer satisfaction and employee safety. Our full-service mechanical contracting company has built an impressive reputation for being trustworthy, knowledgeable, and reliable. While we specialize in commercial construction and renovations, we also provide a variety of essential services such as plumbing, HVAC, piping installations, and preventative maintenance. No matter the circumstances, we never compromise on safety, professionalism, or quality of work. We have a clear sense of purpose and a vision for the future that motivates us and drives everything we do.

We know our success is a direct result of the hard work our experienced, capable team puts out in the world. That is exactly why we foster a positive work environment where employees feel supported and taken care of. We have high expectations of our team, which is why we offer opportunities for continual training so employees can strengthen their skills. Our team also enjoys great pay and generous benefits.

QUALIFICATIONS FOR AN HVAC TECHNICIAN

- Journeyperson certification OR registered apprentice at a 3rd or 4th-year level
- Commercial HVAC experience in mechanical service, specifically preventive maintenance
- Knowledge about safe operating procedures such as FLHAs (field-level hazard assessments)
- Knowledge about HVAC equipment, controls, wiring, boilers, and building management systems (BMS)
- Ability to troubleshoot, diagnose, and repair equipment
- Clean driving record and ability to pass a background check upon hire
- Experience with troubleshooting gas equipment or servicing heating boilers would be a plus.

Do you thrive in fast-paced, busy environments? Are you highly goal-oriented? Do you pay close attention to details? Can you work well as a part of a team? If yes, you might just be perfect for this HVAC technician position!

If you feel that you would be right for this HVAC technician job, please fill out our initial 3-minute, mobile-friendly application. We look forward to meeting you!
